

Part 2: Add Images to the Website

Now that we have a core webpage. Let's add images to the page to give it more visual appeal.

- Load Chevrolet_Logo.psd into Adobe Photoshop. Save the image as an appropriate web image format of jpg, png or gif. Be sure to save the file into the “3-In-Class-Lab” folder.
- Add the logo using the `` before the Mission Statement information.
- Create a secondary heading called “Print Ads” that comes after the Chevrolet Resources section. Add in the three vintage print ads into the webpage.
