

Part 3: Add Audio and Video

In the last part we will add classic Chevrolet audio and video ads to this webpage. In this examples the ads have already been prepared for you in the folder.

- Create a secondary heading entitled “Radio and Tv Ads. This should come AFTER the print ads.
- Use the <audio> and <video> tags to add in the radio and tv ads into this page.
- Make sure to save this in-class lab to your own files. Make sure to save the HTML, image, audio and video files all together. Just copying the HTML without the other resources will cause an error when presenting the file in the future.
