In Class Lab: Chevrolet Webpage

In this in-class lab you will build a webpage for the Chevrolet company. It will be a webpage that information about the company, the company logo and past ads about the company including print, radio and television.

Part 1: Build the Webpage

* Begin by creating a basic webpage using Atom. Be sure to save into the "3-In-Class_Lab" section of the files.

* Be sure to include all the necessary HTML tags including <!doctype>, <html>, <head>, <title> and <body>

* Use the information in Chevrolet_Info.txt to layout basic information including the mission statement and company history. Use the appropiate heading and paragraph formatting tags

  Make sure to test your webpage into a browser.

* Add Hyperlinks

* After the company history section add a secondary called "Chevrolet Resources"

* Create an unorderlist of hyperlinks. Use the websites addresses found in Chevrelot_Links.txt

Save and test that the hyperlinks work correctly.
